

The Mix

Let me tell you about the mix. It wasn't an overnighter. I did Not do it alone. I had a chemist who is a great friend and Another friend that is an engineer for one of the largest Concrete companies in the world with years of calculus Experience. I had a great mix already but they helped me Perfect it. With the proper techniques, you cannot buy a Better mix for your countertop projects. It simply will not Crack. The strength can be duplicated by any company. The Mix will accept add-mixtures which you don't need. It will Accept more aggregate which you don't need. Colors mix With ease. It will shine. It is so easy to work with. We have Tested it at $\frac{1}{4}$ inch thick up to thickness exceeding 6 inches. The properties remain the same. Buy it today. You'll be glad You did..
